

KAREN'S TREND TIP: Denim... It's not just for wearing anymore! It seems to be the new trend in home fabric.

The fabric is durable and weighted. It can withstand a lot! I've seen it as curtains, pillows and table runners. The possibilities are endless.

So, if you're looking for a new look for your home, search no further. Give it a try! It seems like a good choice if you've got kids and pets, too!
